

DOD Technologies, Inc.

Innovative Life Safety Systems & Services

New Revolutionary
Patent Pending
Colorimetric
Gas Detection Design

“VisionSense” Technology

The next Generation of Intelligent
Colorimetric Optics (Patent Pending)

Optics that enables smarter
algorithms for better gas detection
decisions and gas species separation.

VisionSense Technology

Differentiate and specifies a variety of different gases on the same ChemLogic cassette media. Allowing Emergency responders to make smarter decision in an emergencies.

Differentiate for example H_2S from B_2H_6 or ASH_3 . Also identifies humidity changes , water droplets, smoke and particles from actual gas releases.

The ultimate design to eliminate false alarms!

VisionSense Technology

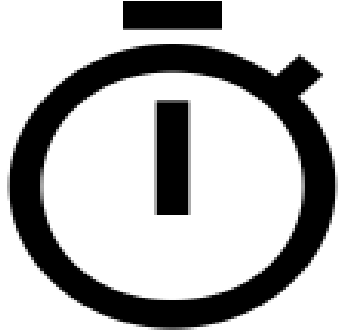

Seeing is believing! VisionSense Technology is the only colorimetric system in the world that records the actual development of the colorimetric color change on the sensing media .

True verification and recorded proof that a gas release occurred.

Video records the actual gas release for a Physical Verification of a stain. A State of the art platform allows you to view anywhere to make quick decisions on evacuations.

VisionSense Technology

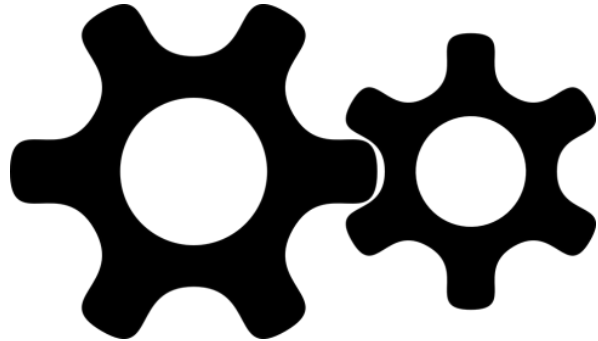

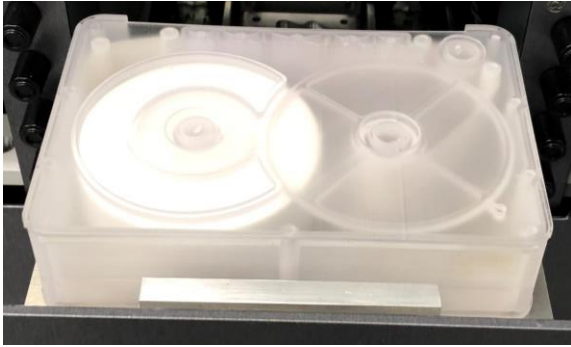

Ultra Fast Transport Times

New mechanical optic design features eight simultaneous channels of continuous media surface exposure without restriction.

Our surface flow sensing technology design allows for up to 3X faster transport time.

Fastest response, meeting all world regulatory gas detection requirements!!!

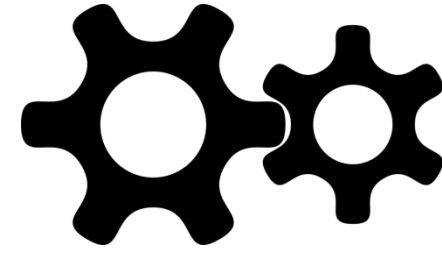

New Analyzer Module featuring :

- Easy Quick Change ChemLogic Cartridge
- RFID smart cassette notifies analyzer of quality and nature of cassette.
- Simple release, push open analyzer
- Adjacent flow adjust

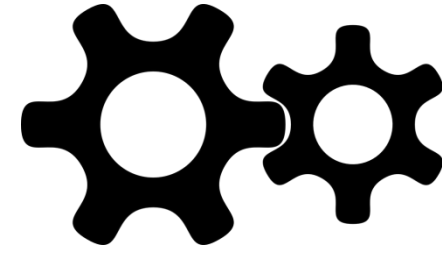

- Reduces Cassette changes from minutes to seconds

New Analyzer Module featuring :

- Inclusive Smart Module design for quick change and simple system expansion in the field.
- Closed loop encoder for precision tape advance, insuring tape usage accuracy.
- Newly designed sample flow sensor board with an optional RH sensor.

New Analyzer Module featuring :

- Small Inclusive Smart point Modules allow for unlimited configurations from 4 to 100's of detection points.
- Each module is smart with ethernet output allowing for special configurations and interfaces.

Intelligent Interfaces

New web interface for accessibility and viewing over ethernet network

- View current data in remote App Android or iPhone
- 24 hour trending and data collection for analysis/ reporting /record keeping
- Complete sophisticated system self checks to insure equipment operations
- User friendly interfaces that build confidence in operator.

Intelligent Interfaces

DOD Technologies Integrations and Service team has worked throughout the World to create customized solutions that solve customers short and long term safety concerns. Customized solutions are available.

We look forward to understanding your special requirement and the opportunity to work with you
