

IH Sampling of Contract Employees

Don E. Baskin, P.E.
ESH Operations Manager

Where research meets manufacturing

Advanced Materials Research Center, AMRC, International SEMATECH Manufacturing Initiative, and ISMI are servicemarks of SEMATECH, Inc. SEMATECH, the SEMATECH logo, Advanced Technology Development Facility, ATDF, and the ATDF logo are registered servicemarks of SEMATECH, Inc. All other servicemarks and trademarks are the property of their respective owners.

IH Monitoring of Contract Employees

- ATDF employs a number of methods for ensuring safe work environments in chemical use areas:
 - Engineering controls,
 - Process equipment and/or area monitoring,
 - Personal Protective Equipment
- Historically, ATDF has not performed personal sampling of contract employees.
 - Contractors are provided information on the potential hazards associated with chemicals in their work areas, as well as information on appropriate PPE
 - The contractor's employer is responsible for providing “non-consumable” PPE (respirators, steel-toed boots, etc.) to its employees
 - If desired by the contractor, it is the responsibility of his/her employer to conduct personal breathing zone sampling.
